

Group 15: NGC 2547

Christina Prakash, Aisha Bulhan

Observing Session: 31/03/2026

- Young open star cluster in Vela Constellation
- Literature Distance: $\sim 360\text{--}400$ pc
- Literature Age: $\sim 30\text{--}40$ Myr
- BVR Imaging and combining
- No data regions (from automatic alignment) appearing as sources
 - May require cropping or alternative combine method.
- Data Analysis Plan
 - Cataloguing stars and photometry. Evaluating an appropriate threshold
 - Determine distance and age using HR diagram with colours and absolute magnitudes
 - Initial mass function using main sequence star luminosities.
